*PURE COOKING PLEASURE*

2023 | 2024

## OVER 90 YEARS OF TRADITION, A SOURCE OF TRUE PRIDE!

Gustav Rommelsbacher

Susanne and Wilfried Bauer

Sigrid Klenk

1928

1953

1991

Our roots lie in Stuttgart, where Dipl.-Ing. Gustav Rommelsbacher started his business in the year 1928 with the design and production of loudspeaker systems. He was an inventive genius with innovative ideas and the good instinct for the trends and needs of his time.

After World War II, Dinkelsbuehl became his new home. He started his production in a garage, with all materials he could get hold of, and made electric appliances which were urgently needed. Radiators, electric irons and mobile hotplates were manufactured under the brand name robusta and soon they were delivered to several countries.

The first brick-built factory was designed and expanded in the years that followed. His son, his daughter and his son-in-law joined the team and robusta became ROMMELSBACHER. In a spirit of great commitment, with high quality appliances and the strengths of a family-owned company, they developed a brand which is well-known for its first class products.

In 1991, the third generation entered the business and in 1995, ROMMELSBACHER moved premises to a larger block of buildings which formed the perfect basis for further growth.

Modernization and expansion started in 2014, making the Dinkelsbuehl premises fit for the future, since the fourth generation is already waiting in the wings.

## QUALITY MADE IN GERMANY

110 employees with more than 1.000 years of cumulated ROMMELSBACHER know-how develop, design and manufacture high-quality appliances which are Made in Germany and provide 'Pure Cooking Pleasure' true to our company's motto.

We can react flexibly on your requirements and offer tailor-made solutions, which convince not only thanks to functional and aesthetic qualities but also for economic reasons.

We take pride in our over 90-year history, our committed team, our family-owned company and our brilliant range of products, which is presented in this catalogue and well worth a browse.

## MULTI RICE COOKER MRK 500 Risa

**Versatile - for all common types of rice, as well as for soup and steaming**

- high quality Cool Touch casing
- innovative "low carb" function for less carbohydrates
- for preparation of up to 6 servings of rice
- integrated heating plate for quick heating, practical keep warm function
- 6 programmes for various and individual use:
  - rice, whole grain & Risotto, "low carb" (regulated automatically)
  - rice pudding, soup, heating up (adjustable cooking time)
- electronically controlled temperature monitoring for careful preparation
- clear LED-display, showing programme selection, residual time and keep warm time
- comfortable operation by Touch Control sensors
- removable inner pot (2 litres capacity) with non-stick coating for easy cleaning and 1,5 litres usable volume
- rice insert made of stainless steel, with lid for "low carb" or steaming
- 4 non-slip rubber feet for a safe stand

Including:

- measuring cup, detachable power cord and serving spoon

*Less carbohydrates in the rice thanks to innovative "low carb" function.*

## RECIPE: PISTACHIO MILK

### INGREDIENTS:

- 100 g pistachios (shelled, unroasted).
- 1 litre water
- 1-2 drops of bitter almond flavouring

### PREPARATION:

1. Place the pistachios in the Vera container and pour in the water.
2. Attach the blending bell and put the lid on. Select the Nuts programme and start.
3. At the end of the programme (approx. 17 minutes), you may additionally pour the pistachio milk through the sieve. This gives an even finer texture. Alternatively, a nut milk bag can be used, if available.
4. Finally add the flavouring.

**If you like, you can also sweeten the pistachio milk slightly. We recommend agave syrup or rice sirup.**

## RECIPE: MANGO-ORANGE-GINGER SMOOTHIE

### INGREDIENTS for 2 servings:

- 4 oranges
- 1 mango
- 10 g ginger
- 1 lime
- 1 tsp turmeric

### PREPARATION:

1. Peel and grate the ginger.
2. Cut the orange and lime in half and squeeze out the juice.
3. Peel the mango, remove the flesh from the stone and dice.
4. Put the mango, orange juice, lime juice, ginger and turmeric into a blender and blend until smooth.
5. Pour into a glass and enjoy.

PU: 6

## EXCELLENT ELECTRICAL HOUSEHOLD APPLIANCES

There are many rewards for quality and design that affirm the excellent working of the complete team. Each single logo is a proof for us that our products and the trade mark ROMMELSACHER are going down well also with the consumers and that people appreciate our high quality standard.

"We attach great importance to the fact that our brand values like quality, reliability and a strong customer focussing are not only communicated, but get also implemented and put into practice stringently.", said Mrs. Sigrid Klenk, managing director of the ROMMELSACHER ElektroHausgeräte GmbH.

We are meeting this challenge with great pleasure and get excited even more when our efforts get recompensed by so many excellent rewards. See a selection of our rewards below.

## SUSTAINABILITY – MORE THAN MERE ECOLOGY!

We understand sustainability as a holistic approach, a composition of ecology, economy and social responsibility. ROMMELSBACHER is one of the very few enterprises in the electrical household sector who is manufacturing in Germany. Materials and components are mainly purchased from local partners.

We attach great importance to the fact that customers may experience a longstanding and trouble-free usage of our products, pursuant to our motto “pure cooking pleasure”. And just in case, we are keeping a stock of spare and wear parts for our products for years to come, as they can be repaired with simple tools. Even returned appliances get a second life cycle after a thorough check.

Establishing new buildings and doing some renovation work in the year 2015, brought our enterprise up to date with the latest energetic technology. Also the workplaces of our staff were ergonomically and ecologically optimized.

Our next goal is to achieve climate-neutral production at the Dinkelsbühl site. To achieve this, we will use further resources for an ecological energy production.

We develop and distribute appliances that are meant for producing healthy and rich dishes and which comply with a sustainable handling of food. To emphasise are e.g. our vacuuming systems, which prolong the shelf life of foods quite a lot. Also our oil press OP 700 “Emilio” is worth to be mentioned, as it is not only possible to make cold-pressed oil from seeds and kernels but even the remaining oil cake can be used for preparing healthy dishes. And our spiralizer EGS 80 “Gnudel” got the ‘Eat healthy’-Award.

We recently got the grade for “Trusted Sustainability”, which makes us very happy. But we do not consider it to be a final confirmation, however, to be the starting shot for a constant monitoring how we can improve.
