## Rotating glass Shtox

Shtox is a unique, high-quality drinking glass that can spin on hard flat surfaces.

Place the glass on a tabletop, and gently give the glass a spin. A normal glass would stop almost instantly, whereas Shtox twirls seemingly indefinitely - in an elegant fashion.

## Patented form of the bottom

The special design of the bottom of the Shtox glass (protected by an international invention patent) is what allows it to spin as such.

The bottom of each glass is hand-crafted by artisinal masters.

## Made in Germany

Shtox products are made from a very high-quality crystal glass by Nachtmann Bleikristallwerke GmbH, Germany.

## Gift box

Each Shtox glass is luxuriously packaged in a sturdy matte container, embellished with our brand name in delicate silver lettering. Every part of the packaging, from the box, to the internal label (made with designer paper), suggests to the recipient that they are in possession of a very high-quality item.

## Winner of the RedDot design award

The spinning glass Shtox was recognized for its unique design in 2009 and awarded the RedDot design award, one of the most prestigious design awards in the world.
